

Abdulaziz Abukar

(825) 736-0010 | abdulazizabubakarfaqih@gmail.com | [GitHub](#) | Calgary, AB

SUMMARY

Software developer with strong Python and SQL skills, experienced in building data-driven applications and automated workflows. Proficient in developing scalable solutions using modern tools and cloud technologies, with a focus on reliability, performance, and clean system design

SKILLS

Programming: Python (Pandas), SQL, JavaScript

Data Engineering: Apache Airflow, Dagster, dbt, ETL/ELT pipelines, data modeling, star schema

Warehouses & Databases: BigQuery, Snowflake, PostgreSQL, SQL Server, MySQL

Tools: Git/GitHub, Docker, VS Code, Jupyter Notebook, Power BI Desktop

PROJECTS

Calgary Traffic Incidents Pipeline | *Python, Dagster, dbt, BigQuery*

- Built an incremental API ingestion pipeline using Python with watermark-based updates and backfill support
- Designed layered Bronze → Silver architecture in BigQuery using append-only snapshots and MERGE-based logic
- Developed dbt models and tests to transform and validate data into analytics-ready fact and dimension tables
- Orchestrated workflows using Dagster with retries, conditional execution, and structured logging
- Implemented data quality checks to ensure reliable pipeline execution across runs
- Implemented incremental ingestion using watermark tracking to ensure idempotent and duplicate-free data loads

Commerce Data Platform | *Python, SQL, Airflow, dbt, BigQuery*

- Built a production-style ELT pipeline ingesting API data into BigQuery and analytics-ready marts
- Orchestrated batch workflows using Dockerized Apache Airflow with dbt transformations and tests
- Developed reusable ingestion pipelines supporting batch processing, reprocessing, and backfills
- Modeled fact and dimension tables with clear grains to ensure accurate aggregation
- Implemented dbt tests and lineage to validate data quality and pipeline reliability

AQHI Lakehouse | *Python, SQL, Power BI, PostgreSQL*

- Built an end-to-end ETL pipeline ingesting 500k+ AQHI records into structured warehouse tables
 - Designed a star schema model with SQL-based data quality checks for completeness and reliability
 - Built Power BI dashboards using DAX to analyze trends and station performance
-

EXPERIENCE

Data Analyst | *The Halal Foodie* | Calgary, AB

May 2024 - Present

- Analyzed operational data and system metrics to support reporting and decision-making
- Validated and monitored data pipelines feeding Firebase into GraphQL, maintaining 99%+ data integrity
- Investigated and documented data issues, improving system reliability and resolution time
- Identified and resolved data inconsistencies across systems, improving reporting accuracy and downstream reliability

Software Developer | *CG Tech & Design* | Calgary, AB

Jan 2023 - Dec 2023

- Developed and maintained web application features, focusing on performance, reliability, and user experience
- Performed SQL-based data validation and testing, reducing system errors by 80% and improving data consistency
- Implemented backend logic and data handling processes to support dynamic website functionality
- Collaborated with stakeholders to translate business requirements into scalable and maintainable system solutions

Systems Analyst Intern | *Lantra Tech* | Calgary, AB

Jun 2021 - Dec 2021

- Documented system requirements and workflows to support application development
 - Created prototypes and diagrams to communicate system functionality and improvements
 - Supported Agile development through task tracking and cross-functional coordination
-

EDUCATION

Bachelor of Science in Software Engineering – *Western Governors University* | Salt Lake City, UT

May 2025

CERTIFICATIONS

AWS Certified Cloud Practitioner | ITIL 4 Foundation Certification | Business Intelligence Data Analyst – CodeCademy
Microsoft Business Analyst Certificate | Frontend Engineer – CodeCademy
