SUMMARY

Problem solver with a background in software development, experienced in diagnosing issues, improving system reliability, and supporting users in technical environments. Known for clear communication, attention to detail, and delivering practical solutions in fast-paced settings

SKILLS

Programming: Python, JavaScript, React, SQL, HTML, CSS

Databases: MySQL, PostgreSQL, BigQuery, Snowflake

Tools: Git, Figma, Jira, Trello, Power BI

PROJECTS

Calgary Traffic Incidents Pipeline | *Python, Dagster, dbt, BigQuery*

- Built a system to collect and update traffic incident data from an external API
- Identified and resolved issues with duplicate and inconsistent data to improve reliability
- Ensured data stayed accurate and up to date across runs by handling incremental updates
- Monitored pipeline performance and addressed failures to keep the system running smoothly
- Organized data into a clear structure for reporting and analysis

Playwise | *JavaScript, React, HTML, CSS*

- Developed a web application that helps users find and compare video game deals
 - Designed a simple and intuitive interface to make browsing and searching easy
 - Integrated external data sources to display up-to-date game information
 - Troubleshoot and resolved issues affecting functionality and user experience
 - Continuously improved features based on usability and performance
-

EXPERIENCE

Coding Instructor | *Code Ninjas* | Calgary, AB

May 2025 - Feb 2026
